## REMARKS/ARGUMENTS

Claims 9 to 11 and 22 to 23 remain in the current application. Claim 9 has been amended Claims 1 to 8, 12 to 21 and 24 were previously cancelled.

Claims 9 to 11, 22 and 23 have been rejected under 35 U.S.C. 101 since the Examiner has stated that the disclosed invention is inoperative and therefore lacks utility. Applicant respectfully disagrees with the Examiner's rejection, however Claim 9 has been amended to include the subject matter that "a portion of" the slurry is directed through the pullhead/reamer. Support for this amendment is outlined below.

As disclosed on page 7 lines 28 to 31, "While the pullead/readmer 24 is rotating, it causes the slurry to enter the pullhead/reamer 24 via the flutes 48 located in its surface after the which the slurry is then forced into the steel connect 28 and pipe 30. As disclosed on page 7 lines 34 to 35, "Pressure from the released bentonite by the slurry producing jets 50 also causes the slurry to enter the pipe 30 via the set of open flutes 48 defined by the struts 46." It is respectfully submitted that these two passages reflect the nature in how the slurry is moved through the pullhead.

As the pullhead moves through the hole, the slurry produced by the jets may be splashed onto the surface of the pullhead. Further, as outlined in the specification and emphasized by the Examiner, the pullhead 24 creates a borehole that has a diameter approximately equal to the diameter of the pullhead at the second end. The smaller borehole results in less space for the slurry to remain and therefore, at least a portion of the slurry may be dragged forward towards the pullhead as the pullhead creates the hole and then into the steel connect via the flutes.

For at least these reasons, it is respectfully submitted that the disclosed invention is operative and includes utility. Retraction of Examiner's rejection of Claims 9 to 11, 22 and 23 is respectfully requested.

For the above reasons, it is respectfully submitted that the application is now in condition for allowance, which is requested. If there are any outstanding issues, the Examiner is invited to contact the undersigned to discuss this matter further.

U.S. Patent App. No. 10/596,260 RCE submission dated April 14, 2011 In response to Office Action of October 14, 2010

The Commissioner is hereby authorized to charge any additional fees, and credit any over payments, to Deposit Account No. 501593, in the name of Borden Ladner Gervais LLP.

Respectfully submitted, ROTH, et al.
